PROFESSIONAL SUMMARY

Dynamic Software Engineer with 6+ years of experience building and shipping production-grade Java backend systems. Specializing in Spring Boot microservices, I've designed ERP platforms, secure authentication frameworks, and API layers (REST & GraphQL) that serve real users at scale. Focused on delivering robust, well-tested software through disciplined testing practices with JUnit, Mockito, and test-driven development baked into every feature cycle. Comfortable across the full delivery pipeline from Docker containers and Azure/AWS deployments to CI/CD automation and infrastructure provisioning. A strong communicator who partners closely with product, design, and engineering peers to turn ambiguous problems into well-engineered, production-ready systems.

SKILLS & CORE COMPETENCIES

Java Backend — Java (SE/EE), Spring Boot, Spring Security, Spring Data JPA, Hibernate, Microservices Architecture, REST APIs, GraphQL, Kotlin (familiar)

Testing — JUnit, Mockito, Integration Testing, Test-Driven Development (TDD), Shift-Left Testing Practices

DevOps & Cloud — AWS, Google Cloud, Firebase, Heroku, DigitalOcean, Docker, Vercel, Nginx, Apache

Databases — PostgreSQL, MongoDB, MySQL

Frontend — JavaScript, React, Next.js, TypeScript, Three.js, WebGL, TailwindCSS, GSAP, Styled-Components, Chakra UI, Vite

Tools and Practices — Git, GitHub, Bitbucket, Jira, Agile/Scrum, OOP & Design Patterns, SOLID Principles

PROFESSIONAL EXPERIENCE

Software Engineer, Data Age

11/2024 – Present | Harare, Zimbabwe

- Led full product lifecycle delivery from requirements and system design to implementation, testing, and deployment, aligning technical decisions with business goals through cross-functional collaboration.
- Architected and developed scalable backend systems using Java Spring Boot, including RESTful APIs, GraphQL endpoints, microservices, and core ERP modules (authentication, payments, scheduling, user management, analytics, reporting).
- Applied OOP design patterns and SOLID principles with TDD and shift-left testing practices; managed Azure cloud deployments and CI/CD pipelines for automated build and deployment workflows.

Software Engineer, Ikarus 3D

05/2024 – 10/2024 | Punjab, India

- Directed backend infrastructure and DevOps operations for a scalable platform, reducing application load times by 50% through performance optimization and architectural improvements.
- Implemented CI/CD pipelines, containerized deployments with Docker, monitoring systems, and disaster recovery strategies to ensure high availability and business continuity.
- Managed cloud infrastructure provisioning and configuration, applying Infrastructure as Code (IaC) practices to streamline environment management.
- Partnered with stakeholders to align technical architecture with operational and business goals, championing secure development practices and compliance with industry standards.

Full Stack Software Developer, Virtualize Technologies

02/2022 – 05/2024 | Mohali, India

- Architected and delivered end-to-end full-stack solutions using Spring Boot (Java) and React, building scalable backend microservices and GraphQL APIs for 10+ client projects.
- Designed microservices architectures with Spring Boot, PostgreSQL, and Docker, applying OOP design patterns (Factory, Strategy, Repository) and TDD practices with JUnit and Mockito.
- Optimized deployment strategies and CI/CD pipelines with Docker containerization, reducing infrastructure costs by 30% while improving performance and uptime.
- Managed client engagements end-to-end, ensuring timely delivery and fostering repeat business through high-quality output and effective communication.

Backend Java Developer, Baeldung.com

07/2021 – 12/2021 | Delhi, India

- Developed secure enterprise microservices using Java Spring Boot, PostgreSQL, Hibernate, and JPA, following clean architecture principles and established design patterns.

- Implemented multi-user authentication and role-based access control (RBAC) using Spring Security, JWT, and OAuth2 for secure token-based authorization across services.
- Designed and optimized RESTful APIs with comprehensive test coverage using JUnit and Mockito, practicing test-driven development to ensure high code quality.
- Supported cloud deployments on AWS, containerized microservices with Docker, and performed Linux server administration and infrastructure monitoring to improve uptime.

React Frontend Developer, Freelance

11/2020 – 01/2021 | Delhi, India

- Developed a responsive and intuitive UI for a Project Management System MVP using React, delivering within a tight 2-month deadline.
- Designed and implemented an analytics dashboard, enabling efficient project progress tracking and receiving commendation for rapid learning and effective communication.

Associate Java Developer, Allsoft Solutions

07/2020 – 10/2020 | Punjab, India

- Contributed to backend development of authentication and security modules using Java Spring Boot for client MVP applications.
- Implemented JWT-based authentication and Spring Security modules with multi-schema database integration for secure access control.
- Optimized CRUD operations using Spring Data JPA and Hibernate, enhancing database query efficiency and application performance.

Associate IT Technician & Linux Administrator, APG Shimla

02/2019 – 04/2020 | Shimla, India

- Administered and monitored 50+ Linux servers, increasing uptime by 15% through preventive maintenance, automation scripts, and backup protocols.
- Reduced system vulnerabilities by 40% through server hardening, proactive patching, and security best practices.
- Assisted in managing enterprise networking infrastructure (Ethernet/Wi-Fi) across campus, supporting staff and students.
- Provided end-user technical support and training, improving operational efficiency and technical literacy.

EDUCATION

Master of Engineering, Computer Science & Engineering, Chandigarh University

2022 – 2024 | Punjab, India

CGPA: 8.16/10

Bachelor of Technology, Computer Science & Engineering,

2018 – 2022 | Himachal Pradesh, India

APG Shimla University

CGPA: 9.26/10

CERTIFICATIONS

- ITIL Foundation Certification (Alison Academy, 2025)
- Advanced React (Coursera/Meta, 2023)
- Three.js for Web 3D/AR/VR Applications (Udemy, 2022)
- Spring Boot Developer Certification (Baeldung, 2021)
- AWS Cloud Computing and DevOps (LetsUpgrade Training, 2021)
- Expert Coder Program - DS/Algo & Problem Solving (PrepBytes, 2021)

PROJECTS

- **Enterprise ERP Microservices Platform** – Designed and developed modular microservices architecture using Spring Boot, PostgreSQL, and Docker, supporting authentication, payments, scheduling, and analytics modules.
- **Secure Authentication & Authorization Framework** – Implemented enterprise-grade multi-user authentication with Spring Security, JWT, OAuth2, and RBAC, ensuring compliance with security standards.
- **Cloud Infrastructure & CI/CD Pipeline Automation** – Architected CI/CD pipelines and managed cloud deployments across Azure and AWS, reducing infrastructure costs by 30% through containerization.
- **GraphQL API Integration Layer** – Built GraphQL APIs enabling flexible, federated data access across distributed microservices, improving front-end developer experience and reducing over-fetching.

ADDITIONAL INFORMATION

- Strong interest in backend architecture, cloud-native development, and software engineering best practices
- Ambassador at LetsUpgrade Training
- Member of Lions Club and Rotary International (stakeholder/community leadership)
- Passionate about competitive programming and open-source contributions
- ENTJ (Commander) personality type: Extraverted, Intuitive, Thinking, and Judging
- Hobbies: Lawn tennis, badminton, table tennis, literature, and debate
